

WHAT HAPPENS AFTER

RECEIVING YOUR SECOND DOSE OF THE COVID-19 VACCINE?

You will be considered fully vaccinated 14 days after this second dose.

Do I still need to wear a mask?

Yes, wearing a mask protects other people who haven't been vaccinated. It is also required by many counties and cities in Kansas while in public.

Do I still need to socially distance?

Yes, socially distancing will help protect others who haven't been vaccinated. Also, although the vaccine is very effective, it is not 100%, so we still need to socially distance to protect everyone in our community.

Will I need to quarantine?*

Beginning 14 days after this second dose, you will not need to quarantine if you are exposed to a positive case, as long as both of the following are true:

- It hasn't been more than 6 months since your second dose
- AND
- You don't have any COVID-19 symptoms

*Vaccinated inpatients and residents in healthcare settings should continue to quarantine following an exposure.
